DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on November 5, 2007 has been entered.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless-
(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 7, 11, 14, 15, 19 and 24 are rejected under 35 U.S.C. 102(b) as being anticipated by Eder et al. (U.S. Patent No. 5,980,550). Eder et al. discloses using a vaso-occlusive coil (100) for treating aneurysms consisting of a bioactive material coating (Col. 3, Paragraph 2) being made of a fibrin/thrombus-stabilizing molecule (Col. 3, Paragraph 3), being plasma treated (Col. 3, Paragraph 2), subjected to ion implantation (Col. 6, Paragraph 6).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 8-10 and 23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Eder et al. (U.S. Patent No. 5,980,550) in view of Schwarz et al. (U.S. Patent No. 4,414,976).

Eder et al. disclose the claimed invention except the thrombus-stabilizing molecule being plasminogen activator inhibitor or plasmin inhibitor Schwarz teaches that tissue adhesive for use in vascular surgery may be made with Factor XIII, plasminogen activator inhibitor or plasmin inhibitor in order to stimulate wound healing (Column 1 lines 37-44). It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the device of Eder et al. with the thrombus-stabilizing molecule being plasminogen activator inhibitor or plasmin inhibitor, in view of Schwarz, in order to promote healing.

Claim 16 is rejected under 35 U.S.C. 103(a) as being unpatentable over Eder et al. (U.S. Patent No. 5,980,550) in view of Nikolchev et al. (U.S. Patent No. 6,526,979).

Eder et al. disclose the claimed invention except for the vaso-occlusive coil being microtextured. Nikolchev discloses that an occlusive coil is microtextured in order to

promote tissue ingrowth and enhance the occlusion of the vessel (Column 14 lines 9-37). It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the device of Eder et al. with the microtexturing in view of Nikolchev, in order to enhance tissue ingrowth and occlude the vessel.

Response to Arguments

Applicant's arguments with respect to claims 1, 9, 10 and 14-16 have been considered but are moot in view of the new ground(s) of rejection.
